FEATURE ARTICLES BY AUTHOR

Ashley, Steven
"Bridging the Cost Gap with Composites," February, pages 76–80.
"Building a Better Bearing," May, pages 56–60.
"Building the Space Station," July, pages 58–63.
"Composite Car Structures Pass the Crash Test," December, pages 59–63.
"Designing Safer Flywheels," November, pages 88–91.
"Federal Labs and Industry Come Together," October, pages 80–84.
"Getting a Microgrip in the Operating Room," September, pages 91–93.
"Measuring Fluid Levels with Radar," January, pages 82–83.
"A Mechanically Fluidized Vacuum Furnace," January, pages 72–74.
"A New Dimension for Office Printers," March, pages 112–114.
"A Radical Way to Burn," August, pages 64–67.
"Rapid Concept Modelers," January, pages 64–66.
"Robot Spy Planes Peer Over the Horizon," March, pages 84–89.
"Searching for Land Mines," April, pages 62–67.
"Superconductors Heat Up," June, pages 58–63.

Banchieri, Andrew J., et al.
"Monitoring Gas Pipelines," December, pages 68–71.
Baumgartner, Henry
"Spraying Virtual Iron on Real Engines," February, pages 84–86.
Baumgartner, Henry, and Dan Deitz
"Analyzing Electric-Motor Acoustics," June, pages 74–75.
Blake, Daniel M., and D. Yogi Goswami
"Cleaning Up with Sunshine," August, pages 56–59.
Brussino, Giacomo, and Jan Walczak
"Re-engineering CAE," July, pages 70–73.
Burruss, Robert
"Devising Rocket Power for Smaller Engines," April, pages 80–81.
Butow, Raymond
"Photoelectric Sensors for Industrial Systems," March, pages 122–124.

Colenbrander, Kelvin, et al.
"Generators that Won't Wear Out," February, pages 92–96.
Collier, R. Kirk, et al.
"Advances in Heat-Activated Cooling Systems," August, pages 54–55.
Cooper, Michael D., et al.
"Monitoring Gas Pipelines," December, pages 68–71.

mechanical engineering
A war has been raging among insiders at high-tech companies over the ultimate direction of the mother of all networking technologies. At issue: Is the Internet just another fad, or is it going to be the enabling technology of business in the 21st century? For many manufacturers and engineering-service providers, the answer to this question couldn't be more critical.
